PACIFIC COAST GROUND FISH FISHERY **Changes to commercial and recreational fishery management measures**

The National Marine Fisheries Service (NMFS) announces changes to commercial and recreational fishery management measures for the Pacific Coast groundfish fishery off California, **effective November 1, 2012.**

The Pacific Fishery Management Council (Council) recommended changes to management measures at their September 13-18, 2012 meeting in Boise, ID. Changes to management measures are being implemented in an October 17, 2012 *Federal Register* (77 FR 63758) notice that will become effective on November 1, 2012. These changes are described in this public notice.

Commercial Fishery

Open Access (OA) Fixed Gear Sablefish Fisheries South of 36° N. lat.

For complete regulations governing the open access fixed gear groundfish fishery, please see Title 50 CFR Part 660, subpart F. Current trip limit tables, Tables 1-3 (North and South), are included at the end of this public notice.

The Council considered the most recently available fishery data in order to monitor catch and develop appropriate trip limits for this fishery for 2012 such that: catch of sablefish south of 36° N. lat. does not exceed the sablefish ACL while ensuring year-round fishing and marketing opportunities.

The Council recommended and NMFS is implementing the following increased trip limits for 2012, beginning November 1, which are anticipated to achieve, but not exceed the fishery's southern portion of the 2012 sablefish ACL :

- **Open Access Fixed Gear, South of 36° N. lat.,** from "300 lb per day, or one landing per week of up to 1,350 lb, not to exceed 2,700 lb per two months" to **"350 lb per day, or one landing per week of up to 1,750 lb, not to exceed 3,500 lb per 2 months" beginning in period 6, November 1, 2012 through the end of the year.**

See Table 3 (North) and Table 3 (South) to Subpart F, attached, for this change to sablefish trip limits.

Recreational Fishery

California Southern Management Area (SMA) Rockfish Conservation Area (RCA) adjustments south of 34°27' N. lat.

The Council recommended and NMFS is implementing a shift to the seaward boundary line of the recreational RCA in the SMA south of 34°27' N. lat. from the 60 fathom (110 meters) depth contour to the 50 fathom (91 meters) depth contour, beginning November 1, 2012.

Due to uncertainty in the catch estimates, and to reduce the potential for cowcod mortality to exceed the non-trawl allocation in 2012, the Council

considered modifications to the current SMA RCA boundary. Recreational fishing for most groundfish is currently prohibited seaward of a boundary line approximating the 60 fathom (110 meters) depth contour in California south of 34°27' N. lat. The new boundary would expand the closed area, restricting fishing to the area seaward of a boundary line approximating the 50 fathom (91 meters) depth contour, south of 34° 27' N. lat.

This new SMA depth restriction will remain in effect for future years, March 1 through December 31, until rescinded or superseded.

Trip limit tables, effective November 1, 2012 are included at the end of this public notice.

26	SALMON TROLL <i>(subject to RCAs when retaining all species of groundfish except for yellowtail rockfish and lingcod, as described below)</i>							
27	North	Salmon trollers may retain and land up to 1 lb of yellowtail rockfish for every 2 lbs of salmon landed, with a cumulative limit of 200 lb/month, both within and outside of the RCA. This limit is within the 200 lb per month combined limit for minor shelf rockfish, widow rockfish and yellowtail rockfish, and not in addition to that limit. Salmon trollers may retain and land up to 1 lingcod per 15 Chinook per trip, plus 1 lingcod per trip, up to a trip limit of 10 lingcod, on a trip where any fishing occurs within the RCA. This limit only applies during times when lingcod retention is allowed, and is not "CLOSED." This limit is within the per month limit for lingcod described in the table above, and not in addition to that limit. All groundfish species are subject to the open access limits, seasons, size limits and RCA restrictions listed in the table above, unless otherwise stated here.						
28	PINK SHRIMP NON-GROUNDFISH TRAWL <i>(not subject to RCAs)</i>							
29	North	Effective April 1 - October 31: Groundfish: 500 lb/day, multiplied by the number of days of the trip, not to exceed 1,500 lb/trip. The following sublimits also apply and are counted toward the overall 500 lb/day and 1,500 lb/trip groundfish limits: lingcod 300 lb/month (minimum 24 inch size limit); sablefish 2,000 lb/month; canary, thornyheads and yelloweye rockfish are PROHIBITED. All other groundfish species taken are managed under the overall 500 lb/day and 1,500 lb/trip groundfish limits. Landings of these species count toward the per day and per trip groundfish limits and do not have species-specific limits. The amount of groundfish landed may not exceed the amount of pink shrimp landed.						

1/ Bocaccio, chilipepper and cowcod rockfishes are included in the trip limits for minor shelf rockfish.

Splitnose rockfish is included in the trip limits for minor slope rockfish.

2/ "Other flatfish" are defined at § 660.11 and include butter sole, curlfin sole, flathead sole, Pacific sanddab, rex sole, rock sole, and sand sole.

3/ For black rockfish north of Cape Alava (48°09.50' N. lat.), and between Destruction Is. (47°40' N. lat.) and Leadbetter Pnt. (46°38.17' N. lat.), there is an additional limit of 100 lbs or 30 percent by weight of all fish on board, whichever is greater, per vessel, per fishing trip.

4/ The minimum size limit for lingcod is 22 inches (56 cm) total length North of 42° N. lat. and 24 inches (61 cm) total length South of 42° N. lat.

4/ "Other fish" are defined at § 660.11 and include sharks (except spiny dogfish), skates (except longnose skates), rattfish, morids, grenadiers, and kelp greenling. Cabezon and longnose skate are included in the trip limits for "other fish."

6/ The Rockfish Conservation Area is an area closed to fishing by particular gear types, bounded by lines specifically defined by latitude and longitude coordinates set out at §§ 660.71-660.74. This RCA is not defined by depth contours (with the exception of the 20-fm depth contour boundary south of 42° N. lat.), and the boundary lines that define the RCA may close areas that are deeper or shallower than the depth contour. Vessels that are subject to RCA restrictions may not fish in the RCA, or operate in the RCA for any purpose other than transiting.

44	South of 34° 27' N. lat.	100 fm line ^{5/} - 150 fm line ^{5/} along the mainland coast; shoreline - 150 fm line ^{5/} around islands					
45		Groundfish: 300 lb/trip. Species-specific limits described in the table above also apply and are counted toward the 300 lb groundfish per trip limit. The amount of groundfish landed may not exceed the amount of the target species landed, except that the amount of spiny dogfish landed may exceed the amount of target species landed. Spiny dogfish are limited by the 300 lb/trip overall groundfish limit. The daily trip limits for sablefish coastwide and thornyheads south of Pt. Conception and the overall groundfish "per trip" limit may not be multiplied by the number of days of the trip. Vessels participating in the California halibut fishery south of 38°57.50' N. lat. are allowed to (1) land up to 100 lb/day of groundfish without the ratio requirement, provided that at least one California halibut is landed and (2) land up to 3,000 lb/month of flatfish, no more than 300 lb of which may be species other than Pacific sanddabs, sand sole, starry flounder, rock sole, curlfin sole, or California scorpionfish (California scorpionfish is also subject to the trip limits and closures in line 31).					
46	PINK SHRIMP NON-GROUNDFISH TRAWL GEAR (not subject to RCAs)						
47	South	Effective April 1 - October 31: Groundfish: 500 lb/day, multiplied by the number of days of the trip, not to exceed 1,500 lb/trip. The following sublimits also apply and are counted toward the overall 500 lb/day and 1,500 lb/trip groundfish limits: lingcod 300 lb/ month (minimum 24 inch size limit); sablefish 2,000 lb/ month; canary, thornyheads and yelloweye rockfish are PROHIBITED. All other groundfish species taken are managed under the overall 500 lb/day and 1,500 lb/trip groundfish limits. Landings of all groundfish species count toward the per day, per trip or other species-specific sublimits described here and the species-specific limits described in the table above do not apply. The amount of groundfish landed may not exceed the amount of pink shrimp landed.

1/ Yellowtail rockfish is included in the trip limits for minor shelf rockfish. POP is included in the trip limits for minor slope rockfish. Bronzespotted rockfish have a species specific trip limit.

2/ "Other flatfish" are defined at § 660.11 and include butter sole, curlfin sole, flathead sole, Pacific sanddab, rex sole, rock sole, and sand sole.

3/ The commercial minimum size limit for lingcod is 24 inches (61 cm) total length South of 42° N. lat.

4/ "Other fish" are defined at § 660.11 and include sharks (except spiny dogfish), skates (including longnose skates), ratfish, morids, grenadiers, and kelp greenling.

5/ The Rockfish Conservation Area is an area closed to fishing by particular gear types, bounded by lines specifically defined by latitude and longitude coordinates set out at §§ 660.71-660.74. This RCA is not defined by depth contours (with the exception of the 20-fm depth contour boundary south of 42° N. lat.), and the boundary lines that define the RCA may close areas that are deeper or shallower than the depth contour. Vessels that are subject to RCA restrictions may not fish in the RCA, or operate in the RCA for any purpose other than transiting.
